ADDITIONAL INFORMATION

- building plans (if available)
- the most recent insurance documentation/intended coverage for the subject property.

The purpose of this analysis is to estimate "a Replacement Cost". Replacement Cost is the estimated cost to reconstruct, at current prices as of the effective inspection date, a structure with utility equivalent to the building being insured, using modern materials and current standards, design and layout.

The function of the report is to secure adequate and appropriate insurance coverage.

The basic assumption made is that Replacement Cost is exclusive of land value or any other site improvements other than the residential building component.
